

Benjamin William Mezger

Personal Data

Nationality:	German/Dutch/Brazilian
Address:	Florianópolis, SC, Brazil
Phone:	+55 48 99916-9270
Blog:	https://seds.nl
Email:	me@benmezger.nl
Github:	https://github.com/benmezger
Last updated:	June 17, 2021

About Me

I am a driven individual highly motivated in writing well-designed software and helping the team grow together. I have strong experience refactoring large codebases, handling hard deadlines, following software's best practices, and learning new technologies. I have a strong background in cultural adaptability from working and living in different countries and remote and office experience. I pursue a Bachelor in Computer Science, and I expect to graduate with my master's degree by the end of 2022.

Work experience

Mar 2020 Current	Teaching internship at the University of Vale do Itajaí, Florianópolis <ul style="list-style-type: none">– Technical application for a class of Bachelor of Computer Engineering students, covering processes and threads, including IPC, semaphores and mutexes.
Oct 2018 Jun 2021	Software Engineer at Cheesecake Labs, Florianópolis <ul style="list-style-type: none">– Creating AWS cloud infrastructure for web applications and queue-based systems– Implementation of well designed RESTful HTTP APIs– Contributed to internal processes and tool development– Developed and maintained multiple large projects, from micro to monolithic services, with a variety of programming languages
Dec 2015 Oct 2018	Software Engineer at United Academic, Amsterdam (remote) <ul style="list-style-type: none">– Contributed to the development of an open-access library, built with Django, MongoDB, and an extensive infrastructure self-hosted at DigitalOcean– Migrated a significant non-containerized architecture to a containerized web application with Docker, Travis, and Ansible– Setup of automated build processes, tests, and deployments– Managed and maintained a large database of distinct file types and user data– Worked with a fully remote team
May 2017 Apr 2018 <i>research</i>	Academic researcher at National Education and Research Network (RNP), Florianópolis <ul style="list-style-type: none">– Implementation of a multi-factor authentication system for the CAFé federation– Transposition through such authentication through a mobile application system

- Configuration of service providers (SP), LDAP protocols, and Shibboleth Identity providers (LDP)
 - Containerized all services and protocols for mass deployments
- Apr 2016 **Academic researcher (PROBIC) at 4Vision Lab, Florianópolis**
- Jul 2017 *research*
- Research on handling mass people data and pattern recognition through image processing
 - Wrote a web crawler with Pipl.com and Facebook Graph integration for facial pattern recognition
- Dec 2015 **Academic researcher (PROBIC) at 4Vision Lab, Florianópolis**
- Jun 2016 *research*
- Provided a smart industrial environment for the Web of Things (WoF)
 - Developed a lightweight Angular/C++ application running on a single Beaglebone board
 - Wrote a smart-gateway in C++ for controlling textile clothing machines
 - Automated deployments and added continuous integration
- Aug 2014 **Developer at Byne , Florianópolis**
- Jun 2015
- Contributed to the development of communication, monitoring, and control software for critical airport systems
 - Worked mainly with ZeroMQ and Twisted protocol systems
 - Wrote custom Linux boot configuration
- Jun 2012 **Developer at Imgzine, Amsterdam**
- Nov 2013
- Wrote complex web-crawling for news parsing
 - Wrote algorithms on detecting the average time a page gets updated
 - Rewrote outdated Perl crawlers to Python
 - Wrote a diff viewer in Flask for viewing updated page changes

Education

- Nov 2020 **University of Vale do Itajai (UNIVALI)**
- Current*
- Master of Applied Computing in the field of computer architecture and operating systems for real-time embedded aerospace systems.
- Jul 2020 **University of Vale do Itajai (UNIVALI)**
- Bachelor of Science: Computer Science
Thesis title: A microkernel for the RISC-V Instruction Set Architecture
- Jul 2013 **ROC Van Amsterdam**
- Technical degree in Information technology.

Languages

<i>Languages</i>	<i>Proficiency</i>
English	Bilingual
Dutch	Bilingual
Portuguese	Bilingual
German	Elementary
Spanish	Elementary

Technical skills

Programming Languages	Rust, Python, C/C++, Go, Assembly, Java, Javascript, Bash and Latex
Databases:	PostgreSQL, MySQL, SQLite, MongoDB and CouchDB
Operating Systems	Linux (Archlinux, Gentoo, Debian), FreeBSD and Mac OSX
Editor	Emacs and Vim
Tools	Vagrant, Docker, Ansible, Kubernetes, Terraform
Services	Amazon AWS, Heroku, DigitalOcean, Scaleway, Jira, Github, Gitlab
Project Management	Kanban, Scrum, Agile development, etc.

Volunteering & freelance experience

- Mar 2020
May 2020 **Software Engineer at Federal University of Santa Catarina (UFSC), Florianópolis**
- COVID-19 app is a project supported by the Federal University of Florianópolis (UFSC), which controls and prevents the propagation of the COVID-19 pandemic through nearby Bluetooth and GPS. It allows doctors to maintain and create a rule-based system for managing sick patients.
- Oct 2019
Jun 2020
freelance **Lead Software Engineer at Nohs Somos, Florianópolis**
- Nohs Somos provides a social-cause platform for the LGBTQI+ community. They can rate and report local commercial places that are safe or not for the community. It provides features such as a panic button, real-time GPS location sharing, and place reviews.
- Built well-designed API with Django, Django Rest Framework, and PostgreSQL running on Heroku
 - Created Nohs Somos development process for future developers
 - Worked on a fully remote team
- Apr 2017
Jun 2017 **Developer at National Education and Research Network (GidLab), Florianópolis**
- RNP's researchers required virtual machines to do their research by spawning these machines automatically when needed.
- Provide a fully automated environment where a researcher can create a configurable environment that runs Shibboleth IdP, SP, and LDAP
 - Auto destroy unused VMs
 - Develop an automatic pane that communicates with VirtualVM's backend API

Publications and presentations

- Mar 2021
paper **Computer on the Beach 2021**
- A Basic Microkernel for the RISC-V Instruction Set Architecture.
- William Mezger, B., Bortoluzzi, F., Albenes Zeferino, C., Roberto Oliveira Valim, P., & Rossi Melo, D. (2021). A Basic Microkernel for the RISC-V Instruction Set Architecture. Computer on the Beach, 12, 057-063. doi: 10.14210/cotb.v12.p057-063*
- Apr 2020
television **Balanço Geral Florianópolis, local news**
- How does the COVID-19 develop by volunteers at the Federal University of Santa Catarina (UFSC) help prevent COVID-19 propagation in Florianópolis. Video available on [Youtube](#).
- Oct 2017
journal **International Conference on Wireless and Mobile Computing, Networking and Communications (WiMob)**
- Providing a cloud-based smart meter solution to control and monitor electrical quantities of industrial machines.

M. D. Lopes, L. R. P. Rauta, B. W. Mezger and M. S. Wangham, "Providing a cloud-based smart meter solution to control and monitor electrical quantities of industrial machines," 2017 IEEE 13th International Conference on Wireless and Mobile Computing, Networking and Communications (WiMob), Rome, 2017, pp. 1-8, doi: 10.1109/WiMOB.2017.8115807.

Jun 2016
journal

IEEE International Conference on Services Computing (SCC)

Providing a cloud-based smart meter solution to control and monitor electrical quantities of industrial machines.

A. C. Domenech et al., "Providing a Smart Industrial Environment with the Web of Things and Cloud Computing," 2016 IEEE International Conference on Services Computing (SCC), San Francisco, CA, USA, 2016, pp. 641-648, doi: 10.1109/SCC.2016.89.
